

DACIA

ECONOMY

What makes a Dacia so appealing is its value for the money. No other front-wheel drive of its category offers so many standard features.

The performance of its engine is outdone only by its economy. Transport Canada gives a rating of 6.3 L/100 km at 80 km (44 mi./gal.)^{*}

CHOICE

Dacia offers you a choice of 5 models: Dacia Sedan TL 4-door, the standard model; Dacia GTL 4-door, the deluxe model; the station wagon TL and GTL 5-door, economical and very practical; the pick-up truck, sturdy, powerful and still economical with a full 600-kg load capacity.

In other words, a complete range of vehicles that give you a run for your money.

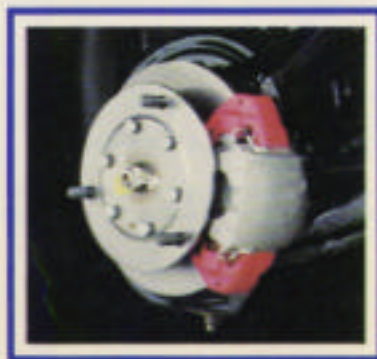

So stop looking around! Try a Dacia and see for yourself its numerous advantages.

* This rating may vary depending on driving habits and road conditions.

seat passenger has a safety belt for complete protection. A laminated windshield protects against glass chips in the event of breakage. Adjustable headrests maximise safety and comfort. Two-speed, variable cycle windshield wipers and an electric rear window defroster ensure proper road visibility in all climatic conditions. A high capacity, variable speed heater ensures fast defrosting in winter and complete flow through ventilation in summer.

All Dacias come with front disc brakes and drums in the rear. Of course, all brakes are power assisted for extra fast stopping a proportioning valve reduces chances of wheel lock-up.

Front-wheel drive combined with rack and pinion steering makes for a safer driving experience whatever the road surface.

In simple terms, a Dacia is built to be driven safely on the most difficult roads in even the toughest weather conditions.
